**Ref.: ISO 17025:2005 maintenance audit**

**Dear client:**

A year after the penultimate maintenance audit of the ISO17025 standard for the evaluation of competition in labs, we inform you that this week we successfully passed the final maintenance audit. We align from now to the re-accreditation next year.

The accredited scopes from September 21, 2010 are:  
"Determination of Gold by fire assay with reading by atomic absorption spectrophotometry" in minerals and  
"Determination of Lithium and Potassium by ICP-OES" in liquid brines.

We send you warm greetings,

**Rubén Cairo**  
Quality and Environmental  
Manager
